Hello Noah,

I got your phone messages—as well as Jeff's; Unfortunately we do not have real time data on the levels of the pond.

But we do have folks in the field keeping us updated!

We are getting ready to send out an email update on the ponds and you will be included in that distribution list!

Please know that as part of the early response actions, EPA provides ongoing oversight, which includes remote monitoring of water quality field measurements thru two websites:

- The USGS measures flow on and around the site; (<http://waterdata.usgs.gov/ca/nwis/current?type=flow>) and

- the USEPA measures surface water parameters downstream of the site on Aspen and Leviathan Creeks; <https://stormcentral.waterlog.com/public/usepar9>

Both the USGS and USEPA sites can be remotely accessed via internet and are not password protected

Please let me know if you have any additional questions, or would like to discuss (415) 947-4183

Best Regards,

Lynda Deschambault

Environmental Scientist

USEPA Region 09

(415) 947-4183

Please be advised I may have limited access to email , therefore please be patient with any communication delays.
